acids, Condensation reactions.

Important conclusions with respect to the constitution
were derived from the study of the structure of the
anions of condensed phosphoric acids. A division can
now be made into metaphosphates, polyphosphates,
isometaphosphates, and another group for which the
constitution has not been definitely established as yet.
Graham's and Kurrol salts belong to this latter group.
An important contribution was made to the chemistry of
the transformations of Kurrol salts. (Author)

DESCRIPTORS: *Pigments, *Inorganic substances.

The object of the investigation was an economical, cement-stable, inorganic blue pigment. Systematic treatment was successful in finding, in Manganese Blue, a technically satisfactory solution. In addition, different other blue pigments, consisting of binary (analogous to Rinnans green) or ternary oxide compounds, were found. The work was extended to rust-protective pigments and subsequently the ferrites of Pb and Ba, and especially of lead cyanamide were found to be very good rust-protective pigments.

DESCRIPTORS: *Physical chemistry, *Molecular
association, Molecular weight, Chemical bonds, Heat
of formation, Thermodynamics, *Stereochemistry.

The stoichiometric combination of similar and dis-
similar molecules to form associates or aggregates had
been reported earlier with the aid of the law of mass
action. The required equations have been generalized
in this study and extended to include gaseous associate-
builders and made applicable, for the purpose of com-
parison, to reversible primary-valence reactions.

The name "condensed phosphate" has been given to
the metaphosphates, $M\overset{+}{e}_n \left[\overset{-}{P}_nO_{3n} \right]$, polyphos-
phates, $M\overset{+}{e}_n + 2 \left[\overset{-}{P}_nO_{3n+1} \right]$ or $M\overset{+}{e}_n \left[\overset{-}{H}_2P_nO_{3n+1} \right]$,
isometaphosphates, and cross-linked polyphosphates.
Nomenclature, preparation, and properties are dis-
cussed. In particular, it is shown that the salts of
polyphosphates of high molecular weight should be
